

March 2011

Quazer™ 3.1 Technical Notes

Technical Issues

- 1. **Hasp –** New Hasp version \rightarrow 5.95.
 - Hasp plug is required for installation, upgrade, and removal (uninstall unless you would like to remove application without hardware not recommended).
 - In case of a failure of HASP recognition, use the new driver or ClickI5.95.exe, located under: Install Disk\HASP\SRMHASP
- 2. **DirectX 9 –** new DirectX 9 driver with Microsoft latest updates (June 2010) is required and installed during the installation process.
- 3. **Multiple Applications –** Working simultaneously with Quazer 3.0 and Quazer 3.1 is not possible due to Hasp version update. This message will appear:

- 4. **CP210x USB to UART Bridge** A new CP210x USB to UART Bridge driver is installed during the installation process.
- 5. New Shortcuts new shortcuts of AVI TEST added during installation for camera troubleshoots.

<u>Languages</u>

Quazer 3.1 supports the English language only.

Hasp Upgrade:

Create C2V file:

In order to upgrade the hasp you have to send to Sarin support a C2V file

- 1. Go to Strategist menu Help \rightarrow Hasp display.
- 2. Click on Create C2V button and save that file.
- 3. Click on the Save button and save that file.
- 4. Send the C2V + the txt files to Sarin Support.

Create C2V	Read Upgrade File					

Load V2C file:

After the support will get the C2V they will send you back the V2C file. In order to load that file please follow the next steps:

- 1. Go to Strategist menu Help \rightarrow Hasp display.
- 2. Press the "Read Upgrade file" button
